

# MORI SEIKI

GibbsCAM MTM is a powerful environment for programming CNC multi-task machine tools. Its graphical user interface provides a natural and intuitive approach for creating and optimizing CNC programs. But CNC programming is only as good as the NC code it generates and this is where GibbsCAM truly excels. Working with you, GibbsCAM MTM is configured to your specific machine tool(s) by a team of MTM experts ensuring the highest level of MTM programming power. Factory-built post processors are also supplied ensuring the highest quality of posted output. The following is a list of different models that are currently supported by GibbsCAM MTM.

This is not an all inclusive list, but is only intended to represent the range of Mori Seiki MTM machine tools currently being supported by GibbsCAM MTM. Contact Gibbs and Associates for confirmations as to whether or not a specific Mori Seiki machine tool not listed here is now supported by GibbsCAM MTM.
